Net current zero at first mean pulse
L=8
L=12
L=16
J(m -> m+1)
Transfer sector m
Counterflow does not prove new channels
dispersive levels
one direction per band
J(m -> m+1)
Transfer sector m
All controls start with identical p(m)
original pure state
time-reversal mixture
aligned sector phases
rank one per sector
Variance of transferred pairs
Time after first mean pulse
